

Clinical Director at Eva Health Technologies

Contract basis: permanent, part-time

Location: remote/ home-based, some expectation of travel to events and meetings when/ where government guidelines allow

Salary: £54,000 for 3 days per week

Reporting to: CEO

About this role

Eva Health Technologies is seeking to radically improve the way data is collected, stored and used for the benefit of the health and wellbeing of citizens. We are embarking on an exciting rebuild of our Electronic Health Record for primary care, shaped around the lived needs of patients & clinicians for now & the future.

If you are a visionary leader with an interest in digital & current experience as a GP - we want you!

What you'll do

You would have a pivotal role in designing the solution, ensuring alignment with clinical needs, professional processes and guidelines. Your contributions will extend our existing commitment to clinical safety which lies at the heart of the record. Your insights in these areas will naturally be interwoven in our marketing strategy so that Eva reaches as many clinicians as possible when we go live.

- Work with the Product team to design, review and improve the product features
- Take part in Clinical safety meetings and contribute to the sign off of new releases of the software.
- Facilitate engagement from a wider group of clinicians across the spectrum, and contribute to make a dynamic and engaged 'Eva Community'
- Be the voice of Eva within medical and clinical forums (in person, and through social media)
- Partner with the Sales and marketing team, and contribute to White Papers, sales resources, and sales pitches.
- Continue to work clinically - at least 2–4 days per month - in a different role, to ensure you have the lived experience, and are maintaining your clinical skills.

You would also be part of the team engaging with customers and prospective customers, NHS Digital, and end users. They would represent Eva Health Technologies externally and demonstrate our brand values. They would become an integral part of the Eva Management Team.

What we're looking for

We're looking for someone who is/has:

- Fully qualified GP with at least 2 years working in the UK post-CCT
- You will be working in a locum, salaried or partner GP role currently.
- Experience of digital health, Product, or Informatics in the NHS or healthcare industry - preferred
- Any experience of business management, sales, marketing or research and quality improvement preferred but not certainly essential
- NHS Digital Clinical Risk Management certification - preferred

We are looking for someone with a great attitude to work, ability to self-motivate and problem solve. We'd like to work with someone who takes pride in collaborating with others in the team to get to the best outcomes, and takes the time to understand perspectives from different people's points of view.

About us

At Eva Health Technologies our roots lie in a family-run business with over 30 years of history. We are in the process of a metamorphosis from the old (Microtest) to the new (Eva). We're taking the best bits of our past and have recently rebranded to define what we want to see in the world.

Our goal is to redefine primary care and the technology that supports it. We want to become a mission critical tool for 100,000+ health and care professionals, to help them improve the health and wellbeing of 10m+ people, by 2025.

The software we're developing sits at the heart of the NHS infrastructure and UK healthcare data. As we improve its foundations and turn it into the best-in-class solution in the market, it will genuinely save lives. We envisage a solution that can support the NHS in making data-driven decisions, support front-line healthcare workers in making safer, more informed, decisions, and empower patients to better engage with their own care.

We're backed by PUBLIC, a pioneer in the GovTech space, running an accelerator programme in 4 countries, convening an annual summit, and writing cutting-edge research. Led by ex-deputy head of the No.10 policy unit, Daniel Korski, and venture investor, Alexander de Carvalho, PUBLIC's team has operational experience in government, startups, technology and finance.

The package

In addition to the Salary, and after the probation period has been completed, you will be eligible for performance bonuses and long term incentive plans, alongside others in the Management Team.

Like the rest of the company, you'll have:

- 15 days annual leave per year (prorated from 25 days annually), plus public holidays
- Pension with NEST (<https://www.nestpensions.org.uk/>)

- Access to online training, and a commitment to helping you learn on the job. NHS Digital's Clinical Safety training provided/ paid for, if not already completed.
- Access to an employee and their family /friends voucher and discount scheme with a range of offers and discounts available on personal purchases and experiences
- Company Chromebook provided
- Fully-remote in the short term due to covid 19.
- A unique experience of working with social motivated and highly talented people to improve healthcare for us all, and our friends and families.

Interested? Send your CV plus a brief note introducing yourself and what you're looking for from this role to zoe.rafter@evahealth.co.uk or people@evahealth.co.uk

Eva Health is an equal opportunity employer - we actively encourage applications from underrepresented groups in tech. We are looking for a diverse mix of people to enhance our community.
